DETAILED ACTION

Reassignment of examination

The examiner in charge of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to examiner Mahmoud Gimie, Art Unit 3747.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 39 and 40 are rejected under 35 U.S.C. 102(e) as being anticipated by Marrs (6,328,025).

Marrs discloses an ignition apparatus for an internal combustion engine, comprising: a spark plug mounted to the internal combustion engine; and an ignition coil for supplying less than 17 mJ of ignition energy (column 8, table 1, spark energy 15 mJ) to the spark plug to cause an ignition in the spark plug, wherein the ignition coil is 22 mm or less in coil diameter (col. 2 and ll. 4-5, less than 1 inch or 25.4 mm).

Double Patenting

3. Claims 1,2,8-13 and 19-42 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 3--

7,14-18 and 39-54 of copending Application No. 10/926,003. Although the conflicting claims are not identical, they are not patentably distinct from each other because the application is broader in some respects and adds features in the other respects.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

4. The indicated allowability of claims 23-32 is withdrawn in view of the newly applied obviousness type provisional double patenting.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show ignition coils.
